(54) CHAIR WITH HANGER

(57) Abstract:

PURPOSE: To prevent a suit or the like from losing shape by attaching a hanger-like matter on the outside of the back rest of a chair and by hanging the suit on the outside hanger without hanging it on the back rest of the chair.

CONSTITUTION: Regardless of seasons, in a situation of desk working of a salaried worker, such as an office worker, or sitting on a chair attending at a conference in a conference room, he/she works lying on the back rest of a chair in a condition his/her suit is hung on the back rest. In that case, however, losing shape or soiling by sweat, etc., is heavily on his/her mind. By attaching a hanger-like matter on the outside of the back rest of a chair to solve the problem, and by hanging

his/her suit on the outside hanger without hanging the suit on the back rest of a chair, he/she can work feeling at ease without worrying about losing shape, etc., of the suit.
